A BETTER IP EXPERIENCE

Founded in 1993, CAST focuses entirely on silicon intellectual property. We develop, aggregate, and support digital IP, delivering proven products that save system designers time and money.

Diverse IP Offerings

Our product line can satisfy many of your IP requirements, ranging from leading-edge new cores to reliable standards-based functions. These are available in synthesizable RTL for ASICs or as netlists targeting popular FPGAs.

Easy to Use and Integrate

CAST IP is designed to be easy to use and straightforward to integrate and verify.

Deliverables include high-quality code, documentation, and development aids like simulation models, test cases, processor debug interfaces, and IDEs. Reference designs simplify pre-sales evaluation and provide a head start for system development.

Proven, Low-Risk Products

Our quality standards are high, and all our IP undergoes extreme testing before it gets to you. We conduct rigorous internal testing, participate in industry collaboration plugfests, and partner with popular semiconductor companies to ensure proper functioning and smooth integration.
